Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-9 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 21 and 25-28 of copending Application No. 10/241,416. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-9 are merely broader than claims 1 and 25-28 of the patent. Therefore, the patent claim anticipates the application claims. See *In re Goodman*, 11, F.3d 1046, 29 USPQ 2d 2010 (Fed.Cir.1993).

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Stahl et al. (4,326,639) or King (5,533,633) or Takamatsu (5,860,542).

Stahl (fig. 2) or King (fig. 2) or Takamatsu (figs. 1 and 3) discloses a container comprising a retention structure and a rotational clocking structure (ratcheted teeth) as claimed.

3. Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Babcock et al. (6,557,714).

Babcock et al. disclose, in figs. 1 and 5, a container comprising a retention structure and a rotational clocking structure (ratcheted teeth) as claimed.

1. Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Ma (6,484,896).

Ma discloses, in fig. 18, a container comprising a finish portion 340, an external thread 344, an annular ring, an rotational locking structure 342, the locking structure having a plurality of ratcheted teeth, each comprising a ramped leading surface and a flat trailing surface (see col. 7, lines 1-7).

2. Claims 1-6, 8 and 9 are rejected under 35 U.S.C. 102(e) as being anticipated by Bosl (WO 03/016161)

Bosl discloses, in fig. 2 a container comprising a finish portion 21, an external thread 344, an annular ring 21, a rotational locking structure 24, and the locking structure having a plurality of ratcheted teeth.
